

GOURAB KUMAR LODH

OBJECTIVE

Seeking a DevOps Engineer role leveraging 4+ years of experience in desktop support, Linux administration, and infrastructure operations. Skilled in system troubleshooting, network diagnostics, server management, and data center monitoring with cabling experience. Developing expertise in AWS and automation tools to build scalable, reliable cloud environments. Focused on enhancing system efficiency, deployment pipelines, and high-availability infrastructure through DevOps practices.

WORK EXPERIENCE

Illumia Solutions Pvt Ltd

2025 - Present

Support Engineer

- Managed virtualized infrastructure using Proxmox, including provisioning, decommissioning, upgrades, and Linux server & object storage configurations.
- Performed daily VM and application backups, ensuring data integrity and business continuity.
- Conducted vulnerability assessments with OpenVAS, monitored logs and alerts via Wazuh, and implemented EDR across servers and endpoints.
- Monitored network traffic with Elastiflow, resolved storage utilization issues, and ensured high availability and performance.
- Integrated, configured, and standardized monitoring/security tools, streamlining operations and improving incident response.
- Generated daily, weekly, and monthly infrastructure and security reports to support informed decision-making.
- Provided end-to-end cloud support, including infrastructure handling, storage management, and server downtime monitoring.

Kotak Securities

2022 - 2025

System Engineer

- Managed and resolved technical issues using Symphony ticketing system, improving response and resolution efficiency.
- Optimized SBS Server infrastructure and administered Kaspersky antivirus for enhanced system security and performance.
- Diagnosed and resolved OS, antivirus, network, VPN, and printer issues; installed and upgraded Microsoft Office and Outlook.
- Administered ManageEngine for IT asset management, streamlining inventory tracking and operational processes.
- Conducted IT asset audits to ensure accuracy, compliance, and proper lifecycle management.

Iqniton International Pvt Ltd.

System Engineer

Performed hardware and OS troubleshooting, ensuring system stability and minimizing downtime. Hardware and OS Troubleshooting Installed and configured Microsoft Office applications, ensuring high user productivity. Printer Configuration Conducted basic network troubleshooting, resolving connectivity issues.

TECHNICAL SKILLS

Cloud

• Amazon Web Service

Services: Amazon Elastic Compute Cloud (EC2) | Amazon Simple Storage Service (S3) | Amazon Elastic Block Store (EBS) | Elastic Load Balancing (ELB) | Auto Scaling (AS) | Virtual Private Cloud (VPC) | Identity and Access Management (IAM) | Key Management Service (KMS) | Amazon Elastic File System (EFS) | Simple Notification Service (SNS) | Simple Email Service (SES) | AWS Lambda | Amazon Relational Database Service (RDS) | Amazon DynamoDB

PERSONAL INFO

- Father's Name : Bimal Kumar Lodh
- Date of Birth : 5.01.2001
- Permanent Address : 11/a/3
Bakultala lane, Konnagar, Hooghly
Dist. : Hooghly
Pincode : 712235

• Google Cloud Platform

Services: Compute Engine (GCE) | App Engine (GAE) | Cloud Storage (GCS) | Identity and Access Management (IAM) | Virtual Private Cloud (VPC) | Cloud Run | Cloud Spanner | Cloud SQL | Cloud Bigtable | Kubernetes Engine (GKE)

• *Linux*

- Installation & configuration in various modes; Linux filesystem hierarchy management
- File and directory operations, advanced searches using find and locate
- User and group management, password aging policies, permission & sudo configuration
- Process and service management, boot process understanding, system performance tuning
- SSH configuration, key-based authentication, secure remote access
- Job scheduling with cron and at, disk management, swap and LVM configuration
- Software/package management, archiving, and file transfer operations
- Application Troubleshooting

• *Scripting*

Shell | Python

• *Container*

Docker | Kubernetes

• *CI/CD Pipelines*

Jenkins | Gitlab CI/CD

• *Automations*

Ansible | Chef | Terraform

• *Monitoring*

Checkmk | Zabbix | Wazuh | ELK Stack | Grafana | Prometheus | Graylog

• *Networking*

LAN, PAN, MAN, WAN | OSI Layer | Network Topology | Port Addressing | Network Device | IP Address IP addressing | IP class range DHCP Server | DNS Server NAT | VLAN | NTP
Routing Protocol RIP | OSPF | BGP | EIGRP
